

Department Of Buildings

We have had the privilege of providing IT Helpdesk staffing services to the Department of Buildings (DOB), supporting their operations with skilled and reliable technical professionals. Through this collaboration, we have ensured that the DOB's IT infrastructure remains fully operational, and that their staff receives timely and effective technical support.

Our IT Helpdesk personnel have been tasked with resolving a wide range of technical issues, from troubleshooting hardware and software problems to providing assistance with network connectivity and system access. They have also supported the seamless operation of key systems used by the Department, helping to maintain the efficiency and security of their day-to-day functions.

By providing highly trained IT Helpdesk staff, we have helped the Department of Buildings keep their technology systems running smoothly, which is critical for the agency's ability to carry out building inspections, permitting, and regulatory services across the city. Our team's dedication and expertise have allowed the DOB to focus on its core mission, confident that their IT support needs are in capable hands.
